

## CEPEDA Associates, Inc.

**Number:** Q-45

**Revision:** 3/29/2013

**Title:** **THREAD INSPECTION (SYSTEM 21)**

**Clause:** System 21 shall be used as the minimum inspection requirement when the thread design does not specify an inspection requirement. System 21 of FED-STD-H28/20 may be substituted for System 22 when the design drawing invokes System 22 and does not cite governing specifications that specifically require System 22. System 22 of FED-STD-H28/20 shall be used when the drawing references other governing specifications that specifically require System 22, such as certain thread types of MIL-DTL-1222.
