

CEPEDA Associates, Inc.

Number: Q-61

Revision: 10/3/2023

Title: **PRESERVATION – HANDLING, STORAGE AND SHIPPING**

Clause: Preservation of Electrical Components, Machine Parts, and parts with special process finishes are to be protected during process, normal handling, storage, and shipping. Parts shall be capable of providing protection from water vapor exposure.

Critical machined surfaces such as seating areas, sealing surfaces, weld end prep and adjacent surfaces are to be protected from nicks and other defects.

Parts with special process finish shall be protected from gouges, scratches during normal handling, storage, and shipping. Multiple items being shipped together shall be individually wrapped to protect the finish and/or special process coating (e.g. plating, powder coating, anodizing, etc.).

For more information refer to [QCP300.2, Supplier Quality Assurance Requirements](#).
